Ok will call you in a while. I can't believe he's going to try to hold us hostage to renegotiate the contract. The engineers are getting paid for labor hours to do real work (I think around ~5500 manhours). Unreal.

I'm told he's about 45 days away from producing the legislation and the RFP to do up to ten million project with you. He's hesitant (and his dad called) to do it with the engineer's making more money than him. If he doesn't get like a 4% commission I think they don't think it's worth pushing through.
